REGULATIONS

REGULATION (EU) 2019/787 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 17 April 2019

on the definition, description, presentation and labelling of spirit drinks, the use of the names of spirit drinks in the presentation and labelling of other foodstuffs, the protection of geographical indications for spirit drinks, the use of ethyl alcohol and distillates of agricultural origin in alcoholic beverages, and repealing Regulation (EC) No 110/2008

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 43(2) and 114(1) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee ⁽¹⁾,

Acting in accordance with the ordinary legislative procedure ⁽²⁾,

Whereas:

- (1) Regulation (EC) No 110/2008 of the European Parliament and of the Council ⁽³⁾ has proved successful in regulating the spirit drinks sector. However, in the light of recent experience and technological innovation, market developments and evolving consumer expectations, it is necessary to update the rules on the definition, description, presentation and labelling of spirit drinks and to review the ways in which geographical indications for spirit drinks are registered and protected.
- (2) The rules applicable to spirit drinks should contribute to attaining a high level of consumer protection, removing information asymmetry, preventing deceptive practices and attaining market transparency and fair competition. They should safeguard the reputation which the Union's spirit drinks have achieved in the Union and on the world market by continuing to take into account the traditional practices used in the production of spirit drinks as well as increased demand for consumer protection and information. Technological innovation should also be taken into account in respect of spirit drinks, where it serves to improve quality, without affecting the traditional character of the spirit drinks concerned.
- (3) Spirit drinks represent a major outlet for the Union agricultural sector, and the production of spirit drinks is strongly linked to that sector. That link determines the quality, safety and reputation of the spirit drinks produced in the Union. That strong link to the agri-food sector should therefore be emphasised by the regulatory framework.
- (4) The rules applicable to spirit drinks constitute a special case compared with the general rules laid down for the agri-food sector and should also take into account the traditional production methods in use in the different Member States.

⁽¹⁾ OJ C 209, 30.6.2017, p. 54.

⁽²⁾ Position of the European Parliament of 13 March 2019 (not yet published in the Official Journal) and decision of the Council of 9 April 2019.

⁽³⁾ Regulation (EC) No 110/2008 of the European Parliament and of the Council of 15 January 2008 on the definition, description, presentation, labelling and the protection of geographical indications of spirit drinks and repealing Council Regulation (EEC) No 1576/89 (OJ L 39, 13.2.2008, p. 16).

- (5) This Regulation should set out clear criteria for the definition, description, presentation and labelling of spirit drinks as well as for the protection of geographical indications, and should be without prejudice to the diversity of the official languages and alphabets in the Union. It should also set out rules on the use of ethyl alcohol and distillates of agricultural origin in the production of alcoholic beverages and on the use of the legal names of spirit drinks in the presentation and labelling of foodstuffs.
- (6) In order to meet consumer expectations and to conform to traditional practices, ethyl alcohol and distillates used for the production of spirit drinks should be exclusively of agricultural origin.
- (7) In the interests of consumers, this Regulation should apply to all spirit drinks placed on the Union market, whether produced in the Member States or in third countries. In order to maintain and improve the reputation on the world market of spirit drinks produced in the Union, this Regulation should also apply to spirit drinks produced in the Union for export.
- (8) The definitions of and technical requirements for spirit drinks and the categorisation of spirit drinks should continue to take into account traditional practices. Specific rules for certain spirit drinks that are not included in the list of categories should also be laid down.
- (9) Regulations (EC) No 1333/2008 ⁽⁴⁾ and (EC) No 1334/2008 ⁽⁵⁾ of the European Parliament and of the Council also apply to spirit drinks. However, it is necessary to lay down additional rules concerning colours and flavourings, which should only apply to spirit drinks. It is also necessary to lay down additional rules concerning the dilution and dissolution of flavourings, colours and other authorised ingredients, which should only apply to the production of alcoholic beverages.
- (10) Rules should be laid down regarding the legal names to be used for spirit drinks that are placed on the Union market, in order to ensure that such legal names are used in a harmonised manner throughout the Union and to safeguard the transparency of information to consumers.
- (11) Given the importance and complexity of the spirit drinks sector, it is appropriate to lay down specific rules on the description, presentation and labelling of spirit drinks, in particular as regards the use of legal names, geographical indications, compound terms and allusions in the description, presentation and labelling.
- (12) Regulation (EU) No 1169/2011 of the European Parliament and of the Council ⁽⁶⁾ should apply to the description, presentation and labelling of spirit drinks, save as otherwise provided for in this Regulation. In that regard, given the importance and the complexity of the spirit drinks sector, it is appropriate to lay down in this Regulation specific rules on the description, presentation and labelling of spirit drinks that go beyond Regulation (EU) No 1169/2011. Those specific rules should also prevent the misuse of the term 'spirit drink' and of the legal names of spirit drinks, as regards products which do not meet the definitions and requirements laid down in this Regulation.
- (13) In order to ensure the uniform use of compound terms and allusions in Member States and in order to provide consumers with adequate information, thereby protecting them from being misled, it is necessary to lay down provisions concerning their use for the purpose of presentation of spirit drinks and other foodstuffs. The purpose of such provisions is also to protect the reputation of the spirit drinks used in this context.
- (14) In order to provide consumers with adequate information, provisions on the description, presentation and labelling of spirit drinks which qualify as mixtures or blends should be laid down.
- (15) While it is important to ensure that in general the maturation period or age stated in the description, presentation and labelling of spirit drinks only refers to the youngest alcoholic component, to take account of traditional ageing processes in Member States, it should be possible to provide, by means of delegated acts, for a derogation from that general rule and for appropriate control mechanisms in relation to *brandies* produced using the traditional dynamic ageing system known as the '*criaderas y solera*' system or '*solera e criaderas*' system.

⁽⁴⁾ Regulation (EC) No 1333/2008 of the European Parliament and of the Council of 16 December 2008 on food additives (OJ L 354, 31.12.2008, p. 16).

⁽⁵⁾ Regulation (EC) No 1334/2008 of the European Parliament and of the Council of 16 December 2008 on flavourings and certain food ingredients with flavouring properties for use in and on foods and amending Council Regulation (EEC) No 1601/91, Regulations (EC) No 2232/96 and (EC) No 110/2008 and Directive 2000/13/EC (OJ L 354, 31.12.2008, p. 34).

⁽⁶⁾ Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011 on the provision of food information to consumers, amending Regulations (EC) No 1924/2006 and (EC) No 1925/2006 of the European Parliament and of the Council, and repealing Commission Directive 87/250/EEC, Council Directive 90/496/EEC, Commission Directive 1999/10/EC, Directive 2000/13/EC of the European Parliament and of the Council, Commission Directives 2002/67/EC and 2008/5/EC and Commission Regulation (EC) No 608/2004 (OJ L 304, 22.11.2011, p. 18).

- (16) For reasons of legal certainty and in order to ensure that adequate information is provided to consumers, the use of the names of raw materials or of adjectives as legal names for certain spirit drinks should not preclude the use of the names of such raw materials or of adjectives in the presentation and labelling of other foodstuffs. For the same reasons, the use of the German word '*-geist*' as the legal name of a category of spirit drinks should not preclude the use of that word as a fancy name to supplement the legal name of other spirit drinks or the name of other alcoholic beverages, provided that such use does not mislead the consumer.
- (17) In order to ensure that adequate information is provided to consumers and to enhance quality production methods, it should be possible for the legal name of any spirit drink to be supplemented by the term 'dry' or '*dry*', that is to say that term either translated in the language or languages of the relevant Member State, or untranslated as indicated in italics in this Regulation, if that spirit drink has not been sweetened. However, in line with the principle that food information is not to be misleading, particularly by suggesting that the food possesses special characteristics despite the fact that all similar foods possess such characteristics, this rule should not apply to spirit drinks that under this Regulation are not to be sweetened, even for rounding off the taste, in particular to *whisky* or *whiskey*. This rule should also not apply to *gin*, distilled *gin* and *London gin*, to which specific sweetening and labelling rules should continue to apply. Furthermore, it should be possible to label liqueurs characterised in particular by a tart, bitter, tangy, acerbic, sour or citrus taste, regardless of their degree of sweetening, as 'dry' or '*dry*'. Such labelling is not likely to mislead the consumer, since liqueurs are required to have a minimum sugar content. Accordingly, in the case of liqueurs, the term 'dry' or '*dry*' should not be understood to indicate that the spirit drink has not been sweetened.
- (18) To take into account consumer expectations about the raw materials used for vodka especially in the traditional vodka-producing Member States, adequate information should be provided on the raw material used where vodka is made from raw materials of agricultural origin other than cereals or potatoes or both.
- (19) In order to enforce and to check the application of the legislation relating to rules on ageing and labelling, and to combat fraud, the indication of the legal name and the maturation period of any spirit drink in electronic administrative documents should be made mandatory.
- (20) In some cases, food business operators wish to indicate the place of provenance of spirit drinks other than geographical indications and trade marks to draw consumers' attention to the qualities of their product. Therefore, specific provisions on the indication of the place of provenance in the description, presentation and labelling of spirit drinks should be laid down. In addition, the obligation, laid down in Regulation (EU) No 1169/2011, to indicate the country of origin or the place of provenance of a primary ingredient, should not apply in the case of spirit drinks, even if the country of origin or the place of provenance of the primary ingredient of a spirit drink is not the same as the place of provenance indicated in the description, presentation or labelling of that spirit drink.
- (21) In order to protect the reputation of certain spirit drinks, provisions should be laid down governing the translation, transcription and transliteration of legal names for export purposes.
- (22) In order to ensure that this Regulation is applied consistently, Union reference methods should be established for the analysis of spirit drinks and of ethyl alcohol used in the production of spirit drinks.
- (23) The use of lead-based capsules and lead-based foil to cover the closing devices of containers of spirit drinks should continue to be banned, in order to avoid any risk of contamination, in particular by accidental contact with such capsules or foil, and of environmental pollution from waste containing lead from such capsules or foil.
- (24) Concerning the protection of geographical indications, it is important to have due regard to the Agreement on Trade-Related Aspects of Intellectual Property Rights ('TRIPS Agreement'), and in particular Articles 22 and 23 thereof, and to the General Agreement on Tariffs and Trade ('GATT Agreement') including Article V thereof on freedom of transit, which were approved by Council Decision 94/800/EC⁽⁷⁾. Within such legal framework, in order to strengthen geographical indication protection and to combat counterfeiting more effectively, such protection should also apply with regard to goods entering the customs territory of the Union without being released for free circulation, and placed under special customs procedures such as those relating to transit, storage, specific use or processing.

⁽⁷⁾ Council Decision 94/800/EC of 22 December 1994 concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the agreements reached in the Uruguay Round multilateral negotiations (1986-1994) (OJ L 336, 23.12.1994, p. 1).

- (25) Regulation (EU) No 1151/2012 of the European Parliament and of the Council ⁽⁸⁾ does not apply to spirit drinks. Rules on the protection of geographical indications of spirit drinks should therefore be laid down. Geographical indications should be registered by the Commission.
- (26) Procedures for the registration, modification and possible cancellation of Union or third country geographical indications in accordance with the TRIPS Agreement should be laid down whilst automatically recognising the status of existing geographical indications that are protected in the Union. In order to make procedural rules on geographical indications consistent in all the sectors concerned, such procedures for spirit drinks should be modelled on the more exhaustive and well tested procedures for agricultural products and foodstuffs laid down in Regulation (EU) No 1151/2012, while taking into account specificities of spirit drinks. In order to simplify the registration procedures and to ensure that information for food business operators and consumers is electronically available, an electronic register of geographical indications should be established. Geographical indications protected under Regulation (EC) No 110/2008 should automatically be protected under this Regulation and listed in the electronic register. The Commission should complete the verification of geographical indications contained in Annex III to Regulation (EC) No 110/2008, in accordance with Article 20 of that Regulation.
- (27) For reasons of consistency with the rules applicable to geographical indications for food, wine and aromatised wine products, the name of the file setting out the specifications for spirit drinks which are registered as a geographical indication should be changed from 'technical file' to 'product specification'. Technical files submitted as part of any application under Regulation (EC) No 110/2008 should be deemed to be product specifications.
- (28) The relationship between trade marks and geographical indications of spirit drinks should be clarified in relation to criteria for refusal, invalidation and coexistence. Such clarification should not affect rights acquired by holders of geographical indications at national level or that exist by virtue of international agreements concluded by Member States for the period before the establishment of the Union protection system pursuant to Council Regulation (EEC) No 1576/89 ⁽⁹⁾.
- (29) Preserving a high standard of quality is essential if the spirit drinks sector's reputation and value are to be maintained. Member State authorities should be responsible for ensuring that that standard of quality is preserved through compliance with this Regulation. The Commission should be able to monitor and verify such compliance in order to ascertain that this Regulation is being uniformly enforced. Therefore the Commission and the Member States should be required to share relevant information with each other.
- (30) In applying a quality policy and in particular to attain a high level of quality of spirit drinks and diversity in the spirit drinks sector, Member States should be allowed to adopt rules on the production, description, presentation and labelling of spirit drinks produced in their territory that are stricter than those laid down in this Regulation.
- (31) In order to take into account evolving consumer demands, technological progress, developments in the relevant international standards, the need to improve the economic conditions of production and marketing, traditional ageing processes, and the law of the importing third countries, and in order to safeguard the legitimate interests of producers and food business operators as regards the protection of geographical indications, the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union ('the Treaty') should be delegated to the Commission in respect of: amendments to and derogations from the technical definitions and requirements for spirit drinks; authorising new sweetening products; derogations related to the specification of maturation period or age for *brandy* and the setting up of the public register of bodies in charge of supervising ageing processes; the establishment of an electronic register of geographical indications of spirit drinks, and detailed rules on the form and content of that register; further conditions in relation to applications for the protection of a geographical indication and preliminary national procedures, scrutiny by the Commission, the opposition procedure and cancellation of geographical indications; conditions and requirements for the procedure concerning amendments to product specifications; and amendments to and derogations from certain definitions and rules on description, presentation and labelling. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement

⁽⁸⁾ Regulation (EU) No 1151/2012 of the European Parliament and of the Council of 21 November 2012 on quality schemes for agricultural products and foodstuffs (OJ L 343, 14.12.2012, p. 1).

⁽⁹⁾ Council Regulation (EEC) No 1576/89 of 29 May 1989 laying down general rules on the definition, description and presentation of spirit drinks (OJ L 160, 12.6.1989, p. 1).

of 13 April 2016 on Better Law-Making ⁽¹⁰⁾. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

- (32) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission regarding the publication of the single document in the *Official Journal of the European Union*; and regarding decisions on registration of names as geographical indications where there is no notice of opposition or no admissible reasoned statement of opposition, or where there is an admissible reasoned statement of opposition and an agreement has been reached.
- (33) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission regarding: the rules on the use of new sweetening products; the information to be provided by Member States with regard to the bodies appointed to supervise ageing processes; the indication of the country of origin or place of provenance in the description, presentation or labelling of spirit drinks; the use of the Union symbol for protected geographical indications; detailed technical rules on the Union reference methods for the analysis of ethyl alcohol, distillates of agricultural origin and spirit drinks; granting a transitional period for the use of geographical indications and extensions of such periods; rejections of applications where the conditions for registration are not already fulfilled before the publication for opposition; registrations or rejections of geographical indications published for opposition where an opposition has been submitted and no agreement has been reached; approvals or rejections of Union amendments to a product specification; approvals or rejections of requests for cancellation of the registration of a geographical indication; the form of the product specification and measures concerning the information to be provided in the product specification with regard to the link between the geographical area and the final product; the procedures for, form and presentation of applications, of oppositions, of applications for amendments and communications concerning amendments, and of the cancellation process with regard to geographical indications; the checks and verifications to be carried out by the Member States; as well as the necessary information to be exchanged for the application of this Regulation. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council ⁽¹¹⁾.
- (34) In order to ensure the implementation of the Agreement between the European Union and Japan for an Economic Partnership ⁽¹²⁾, it was necessary to provide for a derogation from the nominal quantities set out in the Annex to Directive 2007/45/EC of the European Parliament and of the Council ⁽¹³⁾ for spirit drinks in order to allow single distilled *shochu* produced by pot still and bottled in Japan to be placed on the Union market in traditional Japanese bottle sizes. That derogation was introduced by Regulation (EU) 2018/1670 of the European Parliament and of the Council ⁽¹⁴⁾ and should continue to apply.
- (35) Given the nature and extent of the modifications which need to be made to Regulation (EC) No 110/2008, there is a need for a new legal framework in this area to enhance legal certainty, clarity and transparency. Regulation (EC) No 110/2008 should therefore be repealed.
- (36) In order to protect the legitimate interests of producers or stakeholders concerned as regards benefitting from the publicity given to single documents under the new legal framework, it should be made possible that single documents concerning geographical indications registered in accordance with Regulation (EC) No 110/2008 are published at the request of the Member States concerned.
- (37) Since the rules on geographical indications enhance protection for operators, those rules should apply two weeks from the entry into force of this Regulation. However, provision should be made for appropriate arrangements to facilitate a smooth transition from the rules provided for in Regulation (EC) No 110/2008 to the rules laid down in this Regulation.

- (38) As regards rules not relating to geographical indications, provision should be made to ensure that there is sufficient time to facilitate a smooth transition from the rules provided for in Regulation (EC) No 110/2008 to the rules laid down in this Regulation.
- (39) The marketing of existing stocks of spirit drinks should be allowed to continue after the dates of application of this Regulation, until those stocks are exhausted,

HAVE ADOPTED THIS REGULATION:

CHAPTER I

- (a) the person concerned is the only producer willing to submit an application; and
- (b) the defined geographical area possesses characteristics which differ appreciably from those of neighbouring areas, the characteristics of the spirit drink are different from those produced in neighbouring areas or the spirit drink has a special quality, reputation or other characteristic which is clearly attributable to its geographical origin.

4. In the case of a geographical indication that designates a cross-border geographical area, several groups from different Member States or third countries may submit a joint application for registration.

Where a joint application is submitted, it shall be submitted to the Commission by a Member State concerned, or by an applicant group in a third country concerned, directly or through the authorities of that third country after consultation of all the authorities and applicant groups concerned. The joint application shall include the declaration referred to in point (c) of Article 23(2) from all the Member States concerned. The requirements laid down in Article 23 shall be fulfilled in all Member States and third countries concerned.

In the case of joint applications, the related national opposition procedures shall be carried out in all the Member States concerned.

5. Where the application relates to a geographical area in a Member State, the application shall be submitted to the authorities of that Member State.

The Member State shall scrutinise the application by appropriate means in order to check that it is reasoned and meets the requirements of this Chapter.

6. As part of the scrutiny referred to in the second subparagraph of paragraph 5, the Member State shall initiate a national opposition procedure that ensures adequate publication of the application referred to in paragraph 5 and that provides for a reasonable period within which any natural or legal person having a legitimate interest and resident or established on its territory may submit an opposition to the application.

The Member State shall examine the admissibility of any opposition received in accordance with the criteria referred to in Article 28.

7. If, after assessment of any opposition received, the Member State considers that the requirements of this Chapter are met, it may take a favourable decision and submit an application dossier to the Commission. In such a case, it shall inform the Commission of admissible oppositions received from a natural or legal person that has legally marketed the products in question, using the names concerned continuously for at least five years preceding the date of the publication referred to in paragraph 6. Member States shall also keep the Commission informed of any national judicial proceedings that may affect the registration procedure.

The Member State shall ensure that where it takes a favourable decision pursuant to the first subparagraph, that decision is made public and that any natural or legal person having a legitimate interest has an opportunity to appeal.

The Member State shall ensure that the version of the product specification on which its favourable decision is based is published, and shall provide electronic access to the product specification.

The Member State shall also ensure adequate publication of the version of the product specification on which the Commission takes its decision pursuant to Article 26(2).

8. Where the application relates to a geographical area in a third country, the application shall be submitted to the Commission, either directly or via the authorities of the third country concerned.

9. The documents referred to in this Article which are sent to the Commission shall be in one of the official languages of the Union.

Article 25

Provisional national protection

1. On a provisional basis only, a Member State may grant protection to a name under this Chapter at national level, with effect from the date on which an application is submitted to the Commission.

2. Such national protection shall cease on the date on which either a decision on registration under this Chapter is taken or the application is withdrawn.
3. Where a name is not registered under this Chapter, the consequences of such national protection shall be the sole responsibility of the Member State concerned.
4. The measures taken by Member States under paragraph 1 shall produce effects at national level only, and shall have no effect on intra-Union or international trade.

Article 26

Scrutiny by the Commission and publication for opposition

1. The Commission shall scrutinise by appropriate means any application that it receives pursuant to Article 24, in order to check that it is reasoned, that it meets the requirements of this Chapter, and that the interests of stakeholders outside the Member State of application have been taken into account. Such scrutiny shall be based on the single document referred to in point (c) of Article 23(1), shall consist of a check that there are no manifest errors in the application, and, as a general rule, shall not exceed a period of six months. However, where this period is exceeded, the Commission shall immediately indicate in writing to the applicant the reasons for the delay.

The Commission shall, at least each month, make public the list of names for which registration applications have been submitted to it, as well as their date of submission. The list shall also contain the name of the Member State or third country from which the application came.

2. Where, based on the scrutiny carried out pursuant to the first subparagraph of paragraph 1, the Commission considers that the requirements of this Chapter are met, it shall publish in the *Official Journal of the European Union* the single document referred to in point (c) of Article 23(1) and the publication reference of the product specification.

Article 27

Opposition procedure

1. Within three months from the date of publication in the *Official Journal of the European Union*, the authorities of a Member State or of a third country, or a natural or legal person having a legitimate interest and resident or established in a third country may submit a notice of opposition to the Commission.

Any natural or legal person having a legitimate interest and resident or established in a Member State other than that from which the application was submitted, may submit a notice of opposition to the Member State in which that person is resident or established within a time limit permitting an opposition to be submitted pursuant to the first subparagraph.

A notice of opposition shall contain a declaration that the application might infringe the requirements of this Chapter.

A notice of opposition that does not contain such a declaration shall be void.

The Commission shall forward the notice of opposition without delay to the authority or body that submitted the application.

2. If a notice of opposition is submitted to the Commission and is followed within two months by a reasoned statement of opposition, the Commission shall check the admissibility of this reasoned statement of opposition.
3. Within two months from the receipt of an admissible reasoned statement of opposition, the Commission shall invite the authority or person that submitted the opposition and the authority or body that submitted the application to engage in appropriate consultations for a period that shall not exceed three months. That deadline shall start on the date when the invitation to the interested parties is delivered by electronic means.

The authority or person that submitted the opposition and the authority or body that submitted the application shall start such appropriate consultations without undue delay. They shall provide each other with the relevant information to assess whether the application for registration complies with the requirements of this Chapter. If no agreement is reached, that information shall also be provided to the Commission.

When the interested parties reach an agreement, the authorities of the Member State or of the third country from which the application was submitted shall notify the Commission of all the factors which enabled that agreement to be reached, including the opinions of the applicant and of the authorities of a Member State or of a third country, or of other natural and legal persons having submitted an opposition.

Irrespective of whether an agreement has been reached or not, the notification to the Commission shall be made within one month from the end of the consultations.

At any time during those three months, the Commission may, at the request of the applicant extend the deadline for the consultations by a maximum of three months.

4. Where, following the appropriate consultations referred to in paragraph 3 of this Article, the details published in accordance with Article 26(2) have been substantially amended, the Commission shall repeat the scrutiny referred to in Article 26.

5. The notice of opposition, the reasoned statement of opposition and the related documents which are sent to the Commission in accordance with paragraphs 1 to 4 shall be in one of the official languages of the Union.

Article 28

Grounds for opposition

1. A reasoned statement of opposition as referred to in Article 27(2) shall be admissible only if it is received by the Commission within the time limit set out in that Article and if it shows that:

- (a) the proposed geographical indication does not comply with the definition in point (4) of Article 3 or with the requirements referred to in Article 22;
- (b) the registration of the proposed geographical indication would be contrary to Article 34 or 35;
- (c) the registration of the proposed geographical indication would jeopardise the existence of an entirely or partly identical name or of a trade mark or the existence of products which have been legally on the market for at least five years preceding the date of the publication provided for in Article 26(2); or
- (d) the requirements referred to in Articles 31 and 32 are not complied with.

2. The grounds for opposition shall be assessed in relation to the territory of the Union.

Article 29

Transitional periods for use of geographical indications

1. The Commission may adopt implementing acts granting a transitional period of up to five years to enable spirit drinks originating in a Member State or a third country, and the name of which contravenes Article 21(2), to continue to use the designation under which they were marketed on condition that an admissible statement of opposition under Article 24(6) or Article 27 shows that the registration of the name would jeopardise the existence of:

- (a) an entirely identical name or of a compound name, one term of which is identical to the name to be registered; or
- (b) other names similar to the name to be registered which refer to spirit drinks which have been legally on the market for at least five years preceding the date of the publication provided for in Article 26(2).

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 47(2).

2. Without prejudice to Article 36, the Commission may adopt implementing acts extending the transitional period granted under paragraph 1 up to 15 years, or allowing continued use for up to 15 years in duly justified cases, provided it is shown that:

- (a) the designation referred to in paragraph 1 has been in legal use consistently and fairly for at least 25 years before the application for protection was submitted to the Commission;

- (b) the purpose of using the designation referred to in paragraph 1 has not, at any time, been to profit from the reputation of the registered geographical indication; and
- (c) the consumer has not been nor could have been misled as to the true origin of the product.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 47(2).

- 3. When using a designation referred to in paragraphs 1 and 2, the indication of the country of origin shall clearly and visibly appear on the labelling.

Article 30

Decision on registration

1. Where, on the basis of the information available to the Commission from the scrutiny carried out pursuant to the first subparagraph of Article 26(1), the Commission considers that the conditions for the registration of a proposed geographical indication are not fulfilled, it shall inform the Member State or third country applicant concerned of the reasons for rejection and shall give it two months to submit observations. If the Commission receives no observations or if, despite the observations received, it still considers that the conditions for registration are not fulfilled it shall, by means of implementing acts, reject the application unless the application is withdrawn. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 47(2).

2. If the Commission receives no notice of opposition or no admissible reasoned statement of opposition under Article 27, it shall adopt implementing acts, without applying the procedure referred to in Article 47(2), to register the name.

3. If the Commission receives an admissible reasoned statement of opposition, it shall, following the appropriate consultations referred to in Article 27(3), and taking into account the results thereof, either:

- (a) if an agreement has been reached, register the name by means of implementing acts adopted without applying the procedure referred to in Article 47(2), and, if necessary, amend the information published pursuant to Article 26(2) provided such amendments are not substantial; or
- (b) if an agreement has not been reached, adopt implementing acts deciding on the registration. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 47(2).

4. Acts of registration and decisions on rejection shall be published in the *Official Journal of the European Union*.

The act of registration shall grant the protection referred to in Article 21 to the geographical indication.

Article 31

Amendment to a product specification

1. Any group having a legitimate interest may apply for approval of an amendment to a product specification.

Applications shall describe and give reasons for the amendments requested.

2. Amendments to a product specification shall be classified into two categories as regards their importance:

- (a) Union amendments requiring an opposition procedure at Union level;
- (b) standard amendments to be dealt with at Member State or third country level.

3. An amendment shall be considered a Union amendment if it:

- (a) includes a change in the name or any part of the name of the geographical indication registered under this Regulation;
- (b) consists of a change of the legal name or the category of the spirit drink;

- (c) risks voiding the given quality, reputation or other characteristic of the spirit drink that is essentially attributable to its geographical origin; or
- (d) entails further restrictions on the marketing of the product.

Any other amendments shall be considered standard amendments.

A standard amendment shall also be considered a temporary amendment when it concerns a temporary change in the product specification resulting from the imposition of obligatory sanitary and phytosanitary measures by the public authorities or is linked to natural disasters or adverse weather conditions formally recognised by the competent authorities.

- 4. Union amendments shall be approved by the Commission. The approval procedure shall follow, *mutatis mutandis*, the procedure laid down in Article 24 and Articles 26 to 30. Applications for Union amendments submitted by a third country or by third country producers shall contain proof that the requested amendment complies with the laws applicable in that third country to the protection of geographical indications.
- 5. Standard amendments shall be approved by the Member State in whose territory the geographical area of the product concerned is located. As regards third countries, amendments shall be approved in accordance with the law applicable in the third country concerned.
- 6. The scrutiny of the application for amendment shall only address the proposed amendment.

Article 32

Cancellation

- 1. The Commission may, on its own initiative or at the request of any natural or legal person having a legitimate interest, adopt implementing acts to cancel the registration of a geographical indication in either of the following cases:
 - (a) where compliance with the requirements for the product specification can no longer be ensured;
 - (b) where no product has been placed on the market under the geographical indication for at least seven consecutive years.

Articles 24, 26, 27, 28 and 30 shall apply *mutatis mutandis* to the cancellation procedure.

- 2. Notwithstanding paragraph 1, the Commission may, at the request of the producers of the spirit drink marketed under the registered geographical indication, adopt implementing acts cancelling the corresponding registration.
- 3. In the cases referred to in paragraphs 1 and 2, before adopting the implementing act, the Commission shall consult the authorities of the Member State, the authorities of the third country or, where possible, the third country producer which had originally applied for the registration of the geographical indication concerned, unless the cancellation is directly requested by those original applicants.
- 4. The implementing acts referred to in this Article shall be adopted in accordance with the examination procedure referred to in Article 47(2).

Article 33

Register of geographical indications of spirit drinks

- 1. The Commission shall adopt, by 8 June 2021, delegated acts in accordance with Article 46 supplementing this Regulation by establishing a publicly accessible electronic register, which is kept up to date, of geographical indications of spirit drinks recognised under this scheme ('the register').
- 2. The name of a geographical indication shall be registered in its original script. Where the original script is not in Latin characters, a transcription or transliteration in Latin characters shall be registered together with the name in its original script.

For geographical indications registered before 8 June 2019, the register shall provide direct access to the main specifications of the technical file as set out in Article 17(4) of Regulation (EC) No 110/2008.

The Commission shall adopt delegated acts in accordance with Article 46 supplementing this paragraph by laying down further detailed rules on the form and content of the register.

3. Geographical indications of spirit drinks produced in third countries that are protected in the Union pursuant to an international agreement to which the Union is a contracting party may be entered in the register as geographical indications.

Article 34

Homonymous geographical indications

1. If a name for which an application is submitted is a whole or partial homonym of a name already registered under this Regulation, the name shall be registered with due regard to local and traditional usage and any risk of confusion.
2. A homonymous name which misleads the consumer into believing that products come from another territory shall not be registered even if the name is accurate as far as the actual territory, region or place of origin of those products is concerned.
3. The use of a registered homonymous geographical indication shall be subject to there being a sufficient distinction in practice between the homonym registered subsequently and the name already in the register, having regard to the need to treat the producers concerned in an equitable manner and not to mislead the consumer.
4. The protection of geographical indications of spirit drinks referred to in Article 21 of this Regulation shall be without prejudice to the protected geographical indications and designations of origin of products under Regulations (EU) No 1308/2013 and (EU) No 251/2014.

- (a) the existing situation in the Union, in particular in areas of consumption;
- (b) the relevant Union or national legislation.

2. A name shall not be protected as a geographical indication where, in the light of a trade mark's reputation and renown, protection could mislead the consumer as to the true identity of the spirit drink.
3. A name shall only be protected as a geographical indication if the production steps which give the spirit drink the quality, reputation or other characteristic that is essentially attributable to its geographical origin, take place in the relevant geographical area.

Article 36

1. The registration of a trade mark the use of which corresponds or would correspond to one or more of the situations referred to in Article 21(2) shall be refused or invalidated.

2. A trade mark the use of which corresponds to one or more of the situations referred to in Article 21(2), which has been applied for, registered, or established by use, if that possibility is provided for by the legislation concerned, in good faith within the territory of the Union, before the date on which the application for protection of the geographical indication was submitted to the Commission, may continue to be used and renewed notwithstanding the registration of a geographical indication, provided that no grounds for its invalidity or revocation exist under Directive (EU) 2015/2436 of the European Parliament and of the Council ⁽²⁴⁾ or Regulation (EU) 2017/1001 of the European Parliament and of the Council ⁽²⁵⁾.

Article 37

ANNEX III

DYNAMIC OR 'CRIADERAS Y SOLERA' OR 'SOLERA E CRIADERAS' AGEING SYSTEM

The dynamic or '*criaderas y solera*' or '*solera e criaderas*' ageing system consists in the execution of periodical extractions of a portion of the *brandy* contained in each of the oak casks and containers that form an ageing scale and the corresponding replenishments with *brandy* extracted from the preceding ageing scale.

Definitions

'Ageing scale' means each group of oak casks and containers with the same level of maturation, through which the *brandy* progresses in the course of its ageing process. Each scale is known as '*criadera*', except the last one, previous to the expedition of the *brandy*, known as the '*solera*'.

'Extraction' means the partial volume of *brandy* drawn from each oak cask and container in an ageing scale, for its incorporation into the oak casks and containers in the next ageing scale or, in the case of the *solera*, for its shipping.

'Replenishment' means the volume of *brandy* from the oak casks and containers of a given ageing scale that is incorporated into and blended with the content of the oak casks and containers of the following scale in terms of age.

'Average age' means the period of time corresponding to the rotation of the total stock of *brandy* that is undergoing the ageing process, calculated by dividing the total volume of *brandy* contained in all the ageing scales by the volume of the extractions made from the last scale – the *solera* – in one year.

The average age of the *brandy* drawn from the *solera* shall be calculated using the following formula: $t = V_t/V_e$, in which:

- t is the average age, expressed in years;
- V_t is the total volume of stocks in the ageing system, expressed in litres of pure alcohol;
- V_e is the total volume of product extracted for shipping during a year, expressed in litres of pure alcohol.

In the case of oak casks and containers of less than 1 000 litres, the number of annual extractions and replenishments shall be equal to or lower than twice the number of scales in the system, in order to guarantee that the youngest component has an age equal to or higher than six months.

In the case of oak casks and containers of 1 000 litres or more, the number of annual extractions and replenishments shall be equal to or lower than the number of scales in the system, in order to guarantee that the youngest component has an age equal to or higher than one year.
